

Kevin Diener

Junior Web Developer

About Me:

Hard working, work well with others. I am willing to learn, improve my skills. I enjoy problem solving, and aim to do any task I am involved in to the best of my ability. Started learning programming after deciding to change careers. I enjoy coding, building my own websites and working out what makes the code work. I am now looking to gain experience to build a career in web development.

Education:

National Senior Certificate (Brackenfell High School, class of 2016)

National Diploma: Mechanical Engineering, Cape Peninsula University of Technology

I studied mechanical engineering for 4 year, before I found a interest in Web Development.

Ubemy Online Course, The complete 2022 Web Development Bootcamp

Currently working on completing this course. Through the course I have built many websites using HTML, styling these website using CSS and Bootstrap. I recently completed a challenge were I built my own blog website. This included making and hosting my own server, using Node and JavaScript to render multiple pages, and handle post requests. Using express templates to make multiple pages. Finally using CSS and Bootstrap to style the website. Currently working on building my own Restful API, after which I will move on to learning about React and C#.

Skills:

Languages I have worked with:

- Html/CSS: Beginner
- Javascript: Beginner
- Node.js: Beginner
- Git: Beginner
- jQuery: Beginner

Currently working on learning:

- React: Novice
- C#: Novice

Employment History:

Mechanical Engineering Internship, Camulas Developments (August 2020 – August 2021):

This internship was a requirement to complete my diploma. My job consisted of what ever the company required of me which included:

- drafting up detailed building floor plans and mechanical parts drawings using AutoCAD software,
- stock taking,
- being in charge of a group of workers who were installing irrigation networks/landscaping,
- going to site to perform quality work and safety checks.
